

## COMPANY OVERVIEW

DCS began its operations in South Australia in 1996 and quickly earned a reputation for delivering projects with exceptional quality, service, and reliability. Our name change in 2006 to Defence Coating Systems (DCS) signalled our substantial expansion into the Defence market. In 2021, upon joining the Rowlands Group of companies—known for their broad range of manufacturing services (including metal fabrication)—DCS gained the capability to offer full turnkey solutions for product development and manufacturing requirements.

## CAPABILITY

- 2x Heated Enclosed Spray Booths, including one of the largest Defence Coating Spray Booths in Australia.
- 3x Open Faced Spray Booths.
- Production line powder-coating facility with automated guns and online iron phosphate pre-treatment.
- Abrasive blasting facilities with the ability to blast up to 7-metre lengths using various abrasive media.
- Tumble blaster for blasting high volumes of small parts.
- Chemical pre-treatment.
- Comprehensive masking services to ensure precise coating control.
- Batch testing and record-keeping for product verification and quality control.
- Full turnkey production and manufacturing including metal fabrication services.

## COMPETITIVE DISCRIMINATORS

- Specialised Defence Industry knowledge and systems based on over 26 years of experience in delivering Defence projects.
- One of Australia's largest Defence Coating Spray Booths.
- Purpose-built 2,300 sqm powder-coating and wet spray facility.
- Capital to fund future capabilities and projects.
- Ability to deliver, complex, large and intricate projects.
- Strong reputation for delivering exceptional customer service.
