

# Mira – your material identification powerhouse

Customs plays a crucial role in border security. Challenges are diverse, ranging from counterfeits to illegal substances and imports all the way to explosives and toxic substances. With Mira handheld identification systems from Metrohm, you are prepared to detect them all – safely and accurately, at the touch of a screen.

OHON

## Use Mira handheld identification systems to immediately...

- perform antifraud operations by determining the authenticity and origin of products
- identify illegal imports like narcotics and explosives
- protect consumers against dangerous goods or contaminated food
- safeguard the environment and identify endangered species
- authenticate documents
- combat terrorism

#### Instant answers for immediate action

Time can be everything: With Mira handheld identification systems, you benefit from on-the-spot-control and measurements in the field – no waiting for results from a laboratory.
