

## Overview

Diversified has years of Defence and Government experience, and a large skilled workforce with security clearances, ready to deliver. For decades, Defence institutions have been at the forefront of applying the latest technology and capabilities to protect Australia and its national interests. The AV industry has been a huge part of that evolution. Delivering high quality, highly functional audio and video conferencing, command centres, and secure communication room implementations, in a timely and compliant manner is critical.

Our Dedicated team of Defence AV experts understand the unique challenges of delivering market leading solutions while ensuring a **budget and schedule that are well understood** and adhered to. We partner with your organisation to **deliver solutions that integrate seamlessly into your existing infrastructure and assets**, ensuring they are as effective as possible as soon as possible, further helping to manage costs.

## CONSULTANCY AND SOLUTION DRIVEN DESIGN

Technology deployments are ultimately investments used to solve complex problems. The obvious or traditional solution may not offer sustainability, integration capability, coordination, supportability, economies of scale or the edge your organisation requires. Our **consultative approach** to finding the right fit for your organisation is backed by real world experience deploying and supporting the technology solutions we propose across the nation and around the globe. **Diversified is product and brand agnostic**, meaning our customers **benefit from the best-fit solution** every time; without the budget surprises often suffered by the market.

# Capabilities

## COLLABORATIVE SPACES

Maximise the value of your **secure meeting spaces with intuitive collaboration, easy-to-use room scheduling and flawless audio and video solutions** that create positive experiences for both in-room and remote participants.

## DIGITAL SIGNAGE

**Modern IPTV systems and large, dynamic LED video walls** display updated digital directories and important messaging wherever - and whenever- it's needed most. Examples would include military data visualisation, and muster point information and reader boards.

## COMMAND & CONTROL

**During a crisis, seconds can mean everything.** We help government clients, including Defence, modernise their audio visual systems in a secure way, to improve information processing and therefore response times, and **reduce downtime.**

## SECURE SOLUTIONS

With more than three decades of experience, we use **secure technology solutions** that are specifically designed for clearance and compliance in the public sector.

## Contact

### Diversified ACT Office

1/164 Gladstone St, Fyshwick ACT 2609
