

COMPANY OVERVIEW

Westside has been serving the defence, commercial, industrial and intuitional building services industry in South Australia since 1998. Our company has established an enviable reputation that delivers projects, service and maintenance activities in a professional manner within budgets and on tight timeframes. We pride ourselves on being innovative, forward thinking and willing to go the extra mile for all our clients.

CAPABILITY

- Planning, engineering, procurement, construction, commissioning, operation, maintenance and retrofitting/upgrading building mechanical systems including HVAC, hydraulic and mechanical plumbing
- Experienced in all forms of building HVAC including VRF, ducted, central plant (air cooled and water cooled)
- Fabrication, installation and operation of poly pipe systems
- Conceptualization, engineering, fabrication, installation, commissioning and maintenance of customised piping systems including:
 - Acting as general builder (prime contractor) for building upgrade works that specifically involve building mechanical and plumbing systems
 - Asset management including planning, scheduling and performing preventative maintenance to ensure life-cycle operations of installed equipment
 - Designing, installing building environment enhancement systems that filter and purify air and remove air borne toxins including COVID-19
